

Project Specification - Version 1.1

This document serves as a test file to demonstrate PDF comparison tools.

Section 1: Overview

The project aims to deliver a scalable backend infrastructure using Python, Redis, and PostgreSQL. The timeline for this phase is estimated at 6 weeks.

Section 2: Requirements

- System must be online 99.9% of the time.
- Maximum response time should be under 150ms.
- User data must be encrypted at rest.
